

## Documentation

### Errors

 Linked image missing alternative text

### What It Means

An image without alternative text results in an empty link.

### Why It Matters

Images that are the only thing within a link must have descriptive alternative text. If an image is within a link that contains no text and that image does not provide alternative text, a screen reader has no content to present to the user regarding the function of the link.

### How to Fix It

Add appropriate alternative text that presents the content of the image and/or the function of the link.

### The Algorithm... in English

An image without alternative text (missing alt attribute or an alt value that is null/empty or only space characters) is within a link that contains no text and no images with alternative text.

### Standards and Guidelines

- [Section 508 \(a\)](#)
- [1.1.1 Non-text Content \(Level A\)](#)
- [2.4.4 Link Purpose \(In Context\) \(Level A\)](#)
